

**Want gearing wider than a triple on a double chainwheel road bike? Want it with upright bars and trigger shifters? You want all this without any price penalty for customization? No problem.**

## ***Wider gearing options .....***

Gearing up to an 11-36 cassette coupled with a compact (34-50 chain-wheel allow for all bikes to be offered with gearing as wide as 120-25. That's both lower and higher than a triple chainwheel bike with 50-39-30 chainwheels and a 12-27 cassette.

All coupled with your choice of SRAM rear road or MTB rear derailleurs.

## ***Straight bar options .....***

Getting a great bike that is both easier on your back and more comfortable to ride has never been easier. If you ride a lot you will still want high quality components and we give you the options you want and need all at amazingly reasonable prices.
